

Too much content?
Too many media files?
Too little time?

Use better tools to
optimise your workflow.

Escape the media overload.

ON :meedi:a

the media ecosystem, where media lives.

Using the latest technologies we provide you with a web-based framework that enables better modes of annotating, searching and repurposing large multimedia archives. This paves the way for a multimedia information management platform that is more flexible and customisable than current repository software. **ON:meedi:a** creates new opportunities for content owners to exploit their digital assets.

- Easy-to-handle management system for your media assets
- Semantic-aware multi-user manual annotation combined with automatically extracted metadata
- Collection publishing as you envision it
- Integrates into your existing offering and infrastructure
- Reacts agilely to your changing requirements

Free your creativity! **ON:meedi:a** allows you to implement and publish your ideas with ease and in one workflow.
